Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a method of treating a metal substrate.

Group II, claim(s) 8-11, drawn to an apparatus for treating a metal substrate.

Group III, claim(s) 12-15, drawn to a product for treating a metal substrate.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of treating the metal substrate with compounds derived from the dry distillation of deciduous wood is taught in JP 74003741B. Therefore the present application lacks a special technical feature under PCT Rule 13.2 because the element is shown in the prior art.

A telephone call was made to Christopher Fildes on 11/28/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Howard E. Abramowitz whose telephone number is 571-272-8557. The examiner can normally be reached on monday-friday 9:00-5:00.
